b. Referring to claim 14, the prior art of record has not taught or suggested *"wherein the urgencies are based upon (a) progress of the threads through the pipeline execution units and (b) expected progress of the program threads through the pipeline execution units" (see pages 3-6, paragraph [0010], [0020], [0021], [0024], [0026] and Figure 3, elements 110 and 114, of the specification, where thread progress prediction is based on the amount of prior thread stalls in the form of an urgency indicator), in combination with the claimed array and thread controller.*
